

Metehan Gokdogan

Flutter Mobile Developer

📁 Employment History

Flutter Mobile Developer at FLondon Company, London,UK
FLONDON Design Agency (London, UK)

February 2024 — Present

Alice AI App (In Progress):

- Developed for both Android and iOS using Flutter, ensuring a consistent cross-platform experience.
- Implemented state management using the provider package, enabling dynamic and responsive UI updates.
- Integrated Firebase Authentication, supporting Google and Apple sign-in methods for seamless user login.
- Followed clean architecture principles, maintaining a scalable and organized codebase.
- Integrated OpenAI API to provide advanced conversational features, enhancing user interactions.
- Set up CI/CD pipelines to automate testing and deployment, improving development efficiency.
- Optimized app performance, ensuring smooth and responsive operation under heavy load.
- Designed and implemented custom UI/UX with engaging animations, focusing on user accessibility.
- Integrated functionality to provide users with personalized conversation starters and pick-up lines based on their profile, enhancing engagement in dating interactions.

Book Flight App: Developed a flight booking app with real-time flight searches and booking via API integrations.

Workout Tracker: Built a fitness tracker for logging workouts, progress monitoring, and goal setting.

Ensured consistent cross-platform development for Android and iOS.

Managed version control and collaborative development using **Git**.

Flutter Mobile Developer at Life Bonder, London, UK

September 2023 — January 2024

At LifeBonder, I developed user-friendly mobile applications using Flutter, collaborating closely with senior developers and designers to integrate UI/UX designs. I contributed to app functionality by analyzing project requirements, integrating third-party APIs, conducting unit tests, fixing bugs, and participating in code reviews to ensure app stability and performance.
